

Placify

Placement & Interview Preparation Application

Placify is a student-focused application designed to help users prepare for placements, internships, aptitude tests, technical interviews, and HR interviews in one place.

Features

- Aptitude practice
- Quantitative aptitude questions
- Logical reasoning practice
- Verbal ability practice
- Technical interview preparation
- HR interview questions
- Company-specific preparation
- Mock tests
- Interview tips
- Practice questions
- Firebase-based data management
- User profile and application features

Technologies Used

- **Python**
- **Kivy**
- **KivyMD**
- **Firebase Realtime Database**
- **PyCharm**
- **Git & GitHub**

Project Structure

The project is organized into separate Python modules for different sections of the application, including:

- Home
- Practice
- Aptitude
- Logical Reasoning
- Verbal Ability
- Technical Preparation
- HR Questions
- Interview Tips
- Company Practice
- Mock Tests

- User Profile

How to Run

1. Clone the repository

```
git clone https://github.com/YOUR-USERNAME/Placify.git  
cd Placify
```

2. Create a virtual environment

```
python -m venv .venv
```

3. Activate the virtual environment

Windows:

```
.venv\Scripts\activate
```

4. Install dependencies

Install the required Python packages used by the project.

For example:

```
pip install kivy kivymd firebase-admin
```

5. Configure Firebase

This project uses Firebase for data storage.

The Firebase service-account credentials are intentionally **not included in this repository for security reasons**.

You will need to configure your own Firebase credentials before running the Firebase-dependent features.

6. Run the application

```
python main.py
```

Screenshots

Screenshots of the application can be added here to demonstrate the user interface and major features.

Future Improvements

- Improve UI/UX
- Add more placement preparation content
- Add progress tracking
- Add more company-specific preparation
- Improve authentication and security
- Add deployment support
- Add analytics and personalized preparation recommendations

Developer

Pavithra

Built as a project focused on helping students prepare for placement and internship opportunities.

Note

This project is intended for educational and portfolio purposes.
